A passionate designer who translates data into stories. I leverage HTML5, Python, JavaScript, and Data Visualisation Libraries to turn data into design. On a mission to spread love, positivity and good vibes around the globe.

Work Experience

Love Alert - Co-Founder and Partner (<http://www.getlovealert.com/>) (Jun, 2020 – Present)

- During the pandemic (COVID-19) designed and developed a mobile app that sends motivational messages as push notifications, to spread love, positivity and good vibes. Designed and animated, over **65 GIPHY stickers with 51 million views** and counting.
- Nudging people towards positive thinking using push notifications in **125+ countries**, including Iran, North Korea, Syria and Afghanistan. With around **20500+ downloads** in 6 months of existence.
- Partnered with RedWolf (<https://www.redwolf.in/love-alert>) to sell Love Alert's merchandise and donate all the profits to COVID relief charities. **Raised around £5,500 in 7 weeks.**

Rolls Royce - Digital and Solutions Intern (Jul, 2019 – Sep, 2019)

- Developed a “**Data Awareness**” e-learning module including Data Privacy, Data Integrity and **General data protection regulation (GDPR) laws**, using HTML5, JavaScript, CSS3 for Rolls Royce employees. Collaborated effectively with various partners to craft the best content.
- Delivered multiple Digital-Mindset boot camps focusing on **Agile** and **Lean philosophies** to Rolls Royce leadership and Engineering teams. Leading to an **outstanding** overall internship rating.
- Managed and completed 2+ projects with external partners in 10 weeks compared to the original estimate of 15+ weeks which accelerated **digital learning of 1200+ people** within the organization.

London School of Economics Students' Union - Web Coordinator (Nov, 2018 – Jul, 2019)

- Developed and managed Interactive Web pages in OneVoice CMS (Content Management System) using HTML, CSS and JavaScript to resolve quality issues for existing web pages leveraging modern web service APIs to enhance union experience of **25000+ students.**

Deloitte - Associate Analyst (Aug, 2017 - Aug, 2018)

- Developed a pivotal web page, resulting in **150,000+ users increase** in positive NPS (Net Promoter Score) rating, via **AEM (Adobe Experience Manager using HTML, CSS, JavaScript, JSON)** for an Australian telecom giant whilst using **GIT** for version control.
- Code quality and workflow inspector for an Australian telecom client's websites leveraging AEM with Adobe Analytics to directly enhance the user experience of **40 million+ users** monthly.
- Primary coordinator and communicator, ensuring high-quality code is delivered quickly and to a high standard in line with product goals and sprint cycles and collaborating with **11+ worldwide teams** inclusive of creative, technical and business capabilities to ensure progressive enhancement.

Education and Certifications

- **Master of Arts in Data Visualisation** - London College of Communication (Sep, 2018 - Jan, 2020)
Dissertation: How **GDPR guidelines** are leading up to unintended camouflaged spying whilst saving the personal space? ([Project](#))
- **Bachelor of Computer Applications (BCA)** - Christ University (Jun, 2014 - Apr, 2017)
Dissertation: **Web-based selfie game** developed using HTML, CSS, JavaScript. Use case of playing with friends via a single camera.
